Crimp System Pliers

- for solder-free electrical connections
- almost parallel crimping die movement
- repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- tools have been set precisely (calibrated) in the factory
- optimum transmission of force due to lever action for fatigue-reduced operation
- ergonomically designed handles
- wide range of different crimp profiles for nearly all common crimp connections (see Art. No. 97 49..)
- further special profiles on request
- different locators for precise positioning of the connectors
- with attached crimping dies for insulated terminals and plug connectors
- Chrome vanadium electric steel in special quality, oil-hardened
